DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 7 and 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 7, lines 2 and 3 include the limitation “an elastic equalizing element being provided so as to be arranged between said receiving shell and said pin.” Since claim 4, line 2 includes the limitation “elastic bearing,” it is not clear as to how many elastic elements are included in the claimed structure in accordance with the specification.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-4, and 7-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Donde et al. (SU 1435501 A).

Donde et al. disclose a vehicle steering wheel comprising: a hub (1), a steering wheel rim (3), and at least one spoke (6) having at least one spoke section, a skeleton (2) for said steering wheel rim and said spoke, said skeleton being interrupted in a region between said spoke section

Art Unit: 3682

and said steering wheel rim to define two separate skeleton parts (4), and a vibration-decoupling means (7) attaching said skeleton parts to each other, said vibration-decoupling means acting in all directions and at least largely isolating said steering wheel rim in terms of vibrations from said at least one section of said spoke;

said vibration-decoupling means is provided at a transition point of said spoke to said steering wheel rim;

said vibration-decoupling means is provided inside said spoke and separates spoke sections from each other in terms of vibrations;

said vibration-decoupling means is formed by an elastic bearing (8);

said bearing has a pin (thin portion of 7) and a receiving shell (9) for said pin, an elastic equalizing element (8) between said receiving shell and said pin;

Allowable Subject Matter

5. Claim 8 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Response to Arguments

6. Applicant's arguments with respect to claims 1-4, 7, and 8 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3682

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
